

# Dual Reader Interface Module

## Overview

The RSC-2 is a two-reader interface module designed to connect a wide range of security devices in access control solutions. The RSC-2 supports interfacing 2 card readers, 8 monitor points and 6 relay outputs to any Open Options intelligent controller. Up to two entry/exit door applications (4 readers total) are supported when connected to OSDP readers. The RSC-2 Series 3 has the same reliable interface and identical footprint as the Series 2 modules, enabling seamless upgrades for existing deployments.

When connected to an Open Options intelligent controller, the RSC-2 can relate the activities of selected system devices to other devices within the system, generating actions and allowing activities to occur independent of the host. The RSC-2 can also locally process access requests based on facility code verification, even when disconnected from an intelligent controller.
